CONTENTS OF VOLUME 14

Volume 14, No. 1, 1982

Brief Review

A role for amines in the antidepressant effect of exercise: a review
Charles P. Ransford 1

Original Investigations

Endorphins and mood changes in long-distance running
Richard A. Markoff, Paul Ryan, and Ted Young 11

The relationship of static muscle function to use of oral contraceptives
J.C. Wirth and T.G. Lohman 16

Biological variability in maximum aerobic power
Victor L. Katch, Stanley P. Sady, and Patty Freedson 21

Anaerobic and aerobic responses of males and females to rope skipping
John E. Quirk and Wayne E. Sinning 26

The effect of stride length variation on oxygen uptake during distance running
Peter R. Cavanagh and Keith R. Williams 30

Aerobic capacity during acute exposure to simulated altitude, 914 to 2286 meters
Ray W. Squires and E.R. Buskirk 36

Effects of wind on the thermal and metabolic responses to exercise in the cold
Emily M. Haymes, Arthur L. Dickinson, Nancy Malville, and Robert W. Ross 41

Effects of interval training on work-heat tolerance of young women
Judith S. Cohen and Carl V. Gisolfi 46

Relationship between power and sprint freestyle swimming
Rick L. Sharp, John P. Troup, and David L. Costill 53

Kinetic differences of two volleyball jumping techniques
Kenneth D. Coutts 57

Summation of segmental velocities in the golf swing
P.D. Milburn 60

Relationship between simulated fire fighting tasks and physical performance measures
Paul O. Davis, Charles O. Dotson, and D. Laine Santa Maria 65

Left ventricular size in competitive weight lifters: an echocardiographic study
Francis J . Menapace, William J. Hammer, Theodore F. Ritzer, Kenneth M. Kessler, Howard F. Warner, James F. Spann, and Alfred A. Bove 72

Beneficial effects of exercise on ℓ-isoproterenol induced myocardial infarction in male rats
Mark I. Darrah and Richard L. Engen 76

Influence of training on the blood pressure changes during lower body negative pressure in rats
Charles M. Tipton, Ronald D. Matthes, and Toby G. Bedford 81

Methodological Investigations

A rat model of psychopathology for use in exercise science
W.P. Morgan, E.B. Olson, Jr., and N.P. Pedersen 91

Suction applied to a muscle biopsy maximizes sample size
W.J. Evans, S.D. Phinney, and V.R. Young 101

Information for Authors vii

Policy Statement Regarding the Use of Human Subjects and Informed Consent x

Volume 14, No. 3, 1982

Letters to the Editor vii

Brief Review

Blood doping and related issues: a brief review
Norman Gledhill 183

Original Investigations

Joint laxity in selected athletic populations
David A. Brodie, Howard A. Bird, and Verna Wright 190

The effects of electrical stimulation of normal quadriceps on strength and girth
John A. Romero, Terry L. Sanford, Richard V. Schroeder, and Thomas D. Fahey 194

Electromyographic manifestations of muscular fatigue
Toshio Moritani, Akira Nagata, and Masuo Muro 198

Physical training effects on muscle morphology in sedentary males at different ages
Lars Larsson 203

Serum high-density lipoprotein cholesterol in male and female Olympic athletes
Yves Deshaies and Claude Allard 207

Brief Review

Blood doping and related issues: a brief review
Norman Gledhill 183

Original Investigations

Joint laxity in selected athletic populations
David A. Brodie, Howard A. Bird, and Verna Wright 190

The effects of electrical stimulation of normal quadriceps on strength and girth
John A. Romero, Terry L. Sanford, Richard V. Schroeder, and Thomas D. Fahey 194

Electromyographic manifestations of muscular fatigue
Toshio Moritani, Akira Nagata, and Masuo Muro 198

Physical training effects on muscle morphology in sedentary males at different ages
Lars Larsson 203

Serum high-density lipoprotein cholesterol in male and female Olympic athletes
Yves Deshaies and Claude Allard 207

Cardiorespiratory responses to ballet exercise and the $\dot{V}O_{2max}$ of elite ballet dancers
Jerald L. Cohen, Karen R. Segal, Ira Witriol, and William D. McArdle 212

Perceived exertion and anaerobic threshold during the menstrual cycle
Lou A. Stephenson, Margaret A. Kolka, and J.E. Wilkerson 218

Differentiated ratings of perceived exertion are influenced by high altitude exposure
Andrew J. Young, Allen Cymerman, and Kent B. Pandolf 223

A comparison of combined running and weight training with circuit weight training
Larry R. Gettman, Paul Ward, and R.D. Hagan 229

Road-racing strategies
Miles A. Townsend 235

The body composition and physical dimensions of 9- to 12-year-old experienced wrestlers
Stanley P. Sady, Wade H. Thomson, Mark Savage, and Marlene Petratis 244

Effects of training and age on $\dot{V}O_{2max}$ in laboratory rats
Anthony J. Pica and George A. Brooks 249

Information for Authors ix

Policy Statement Regarding the Use of Human Subjects and Informed Consent xii

Volume 14, No. 4, 1982

Brief Review

Hyperoxia and human performance: a brief review
Hugh G. Welch 253

Original Investigations

Reproductive system function in women cross-country runners
Diane K. Wakat, Kathleen A. Sweeney, and Alan D. Rogol 263

Metabolic and thermoregulatory responses to exercise during the human menstrual cycle
Lou A. Stephenson, Margaret A. Kolka, and James E. Wilkerson 270

Effect of propranolol on perceived exertion soon after myocardial revascularization surgery
Ray W. Squires, Joe L. Rod, Michael L. Pollock, and Carl Foster 276

Plasma catecholamines, heart rate, and cardiac sympathetic activity in exercising dogs
Francois Peronnet, Reginald Nadeau, Jacques de Champlain and Claude Chartrand 281

The effects of hypercapnia on the metabolic response to steady-state exercise
Terry E. Graham, Brian A. Wilson, Marie Sample, Jan Van Dijk, and Brian Goslin 286

Alterations in anaerobic threshold as the result of endurance training and detraining
A. Elizabeth Ready and H. Arthur Quinney 292

Blood acid-base and lactate relationships studied by ramp work tests
Richard L. Hughson and Howard J. Green 297

"Biorhythms" and men's track and field world records
Brian M. Quigley 303

Forces predicted at the ankle during running
Ray G. Burdett 308

The effects of caffeine and exercise on body weight, fat-pad weight, and fat-cell size
Anthony R. Wilcox 317

Mechanical and physiological calibration of four cycle ergometers
Jack H. Wilmore, Stefan H. Constable, Philip R. Stanforth, Michael J. Buono, Yuan W. Tsao, Frederick B. Roby, Jr., Brian J. Lowdon, and Ronald A. Ratliff 322

Information for Authors xi

Policy Statement Regarding the Use of Human Subjects and Informed Consent xiv

Volume 14, No. 5, 1982

Letters to the Editor v

Brief Review

Post-exercise ketosis and the hormone response to exercise
J. H. Koeslag 327

Original Investigations

Assessing $\dot{V}O_{2max}$ in epidemiologic studies: modification of the Åstrand-Ryhming test
Steven F. Siconolfi, Eileen M. Cullinane, Richard A. Carleton, and Paul D. Thompson 335

Effect of ramp slope on determination of aerobic parameters from the ramp exercise test
James A. Davis, Brian J. Whipp, Norman Lamarra, David J. Huntsman, Marianne H. Frank, and Karlman Wasserman .. 339

Left ventricular size following endurance, sprint, and strength training
Giuseppe Ricci, Daniel Lajoie, Robert Petitclerc, Francois Peronnet, Ronald J. Ferguson, Mario Fournier, and Albert W. Taylor 344

Tennis: the influence of grip tightness on reaction impulse and rebound velocity
Bruce C. Elliott 348

Energy flow during Olympic weight lifting
John Garhammer 353

On the relationship between resultant joint torques and muscular activity
James G. Andrews 361

Methodological Investigation

The nature of torque "overshoot" in Cybex isokinetic dynamometry
Alexander A. Sapega, James A. Nicholas, David Sokolow, and Anthony Saraniti 368

Symposium

Preface to the symposium on recent advances in the study and clinical use of perceived exertion
Bruce J. Noble 376

Psychophysical bases of perceived exertion
Gunnar A. V. Borg 377

Peripheral contributions to the perception of effort
Enzo Cafarelli 382

Central signals of perceived exertion during dynamic exercise
Robert J. Robertson 390

Differentiated ratings of perceived exertion during physical exercise
Kent B. Pandolf 397

Clinical applications of perceived exertion
Bruce J. Noble 406

Information for Authors vii

Policy Statement Regarding the Use of Human Subjects and Informed Consent x

Volume 14, No. 6, 1982

Case Study

Body weight loss in a wrestler preparing for competition: a case report
P.M. Widerman and R.D. Hagan 413

Original Investigations

Effects of aspirin treatment on kidney function in exercising man
Edward J. Zambraski, Thomas A. Rofrano, and Charles D. Ciccone 419

The effect of pangamic acid on maximal treadmill performance
Michael E. Gray and Larry W. Titlow 424

Echocardiographic dimensions in athletes in relation to their training programs
L.H.E.H. Snoeckx, H.F.M. Abeling, J.A.C. Lambregts, J.J.F. Schmitz, F.T.J. Verstappen, and R.S. Reneman 428

A differential catecholamine response during prolonged exercise and passive heating
Scott K. Powers, Edward T. Howley, and Ronald Cox 435

Anaerobic threshold measurements of elite oarsmen
Timothy C. Mickelson and Frederick C. Hagerman 440

Fatness and fat patterning among athletes at the Montreal Olympic Games, 1976
Robert M. Malina, William H. Mueller, Claude Bouchard, Richard F. Shoup, and Georges Lariviere 445

Skeletal muscle adaptation in adolescent boys: sprint and endurance training and detraining
Mario Fournier, Joe Ricci, Albert W. Taylor, Ronald J. Ferguson, Richard R. Montpetit, and Bernard R. Chaitman 453

Changes in muscle metabolites in females with 30-s exhaustive exercise
Ira Jacobs, Oded Bar-Or, Jan Karlsson, Rafi Dotan, Per Tesch, Peter Kaiser, and Omri Inbar 457

Enzyme adaptations in rat skeletal muscle after two intensities of treadmill training
Andrew C. Gillespie, Edward L. Fox, and A. John Merola 461

Oxygen consumption in treadmill-exercised Yucatan miniature swine
Charles D. Ciccone, Constance S. Lakas, and Edward J. Zambraski 467

Norepinephrine increases canine skeletal muscle $\dot{V}O_2$ during recovery
L. Bruce Gladden, Wendell N. Stainsby, and Brian R. MacIntosh 471

Descriptive Study

Reduction in peak oxygen uptake after prolonged bed rest
John E. Greenleaf and Stanislaw Kozlowski 477

Position Statement on The Use of Alcohol in Sports ix

Methodology 91
Methods, psychophysical 406
Mini-pig 467
Modeling 235
Modeling, rigid-link 353
Models, muscle 361
Mood 11
Motor units 198
Muscle 194
Muscle, skeletal 101, 453, 457, 461, 471
Muscle endurance 16
Muscle fatigue 53
Muscle forces 308
Muscle fiber size 453
Muscle fiber types 203, 461
Muscle metabolites 457
Muscle models 361
Muscle strength testing 368
Myocardial infarction, induced 76
Myocardial revascularization surgery 276
Naloxone 11
Norepinephrine 1, 435, 471
Oarsmen, elite 440
Olympic athletes 207, 445
Optimization 235, 361
Optimization, energy 30
Oral contraceptives 16
Oxygen consumption 249, 471
Oxygen debt 26, 471
Oxygen-enriched gases 253
Oxygen uptake 30, 41, 335, 390, 397, 477
Oxygen uptake, maximal (see $\dot{V}O_{2max}$)
Oxygen uptake, relative 390
Oxygenation, hyperbaric 253

Pangamic acid 424
Perceived exertion 276, 377, 406
Perceived exertion, differentiated 223
Perceived exertion, ratings of 218, 322, 390
Percent fat 244
Perception of effort 223, 397
Perceptual cues 390
Performance 65, 303
Performance, aerobic 428
Performance, human 253
Performance, treadmill 424
Performance and predictors 65
Phosphofructokinase 461
Physical activity 207
Physical dimensions 244
Physical education 190
Physical fitness 212, 335
Physical training 344, 453
Physical work capacity 36
Physiological effects of exercise 1
Plasma catecholamines 281
Power 53
Power output 353
Predischarge graded exercise testing 276
Prescription of exercise 406
Principal components 445
Propranolol 276
Prostaglandins 419
Psychological benefits of exercise 1
Psychopathology 91
Psychophysical methods 406
Pulmonary ventilation 223, 397
Pyridoxal phosphate 16
4-Pyridoxic acid 16
Race (ethnicity) 445
Racers, cycle 428
Racing 235
Ramp work tests 297
Rat 76, 81, 91, 249, 317, 461
Ratio of terminal rectal temperature/performance time . 46
Ratio scales 377
Reaction impulse 348
Records 303
Recovery 406
Rehabilitation 194
Relative oxygen uptake 390
Renal function 419
Reproductive cycle function 263
Respiratory exchange ratio 286
Respiratory rate 390
Responses, cardiorespiratory 212
Responses, metabolic 270, 286
Responses, thermoregulatory 270
Resultant joint torque 361
Rhythms, biological 303
Rigid-link modeling 353
Rope skipping 26
Rowing ergometer 440
Running 223, 235, 308
Running, biomechanics of 30
Running, cross-country 263
Running, distance 11, 30, 428
Running efficiency 30
Serotonin 1
Sex differences 26, 406, 445
Skinfolds 445
Sotalol 281
Sports 207
Sports acrobats 190
Sprague-Dawley rodents 461
Sprint 344
Sprint training 453
Stimulation, electrical 194
Stimulation, faradic 194
Strategy 235
Strength 194, 223, 344
Stress, heat 435
Stride length 30
Submaximal fitness 292
Succinic oxidase 461
Suction 101
Surgery, myocardial revascularization 276
Swimming 53
Swimming, freestyle 53
Swine (see mini-pig) 467
Sympathectomy 281
Sympathetic system 281
Take-off velocity 57
Tennis 348
Testing, muscle strength 368
Testing, predischarge graded exercise 276
Thermal response to exercise 41
Time constant for oxygen uptake kinetics 339
Timing 60
Tissue insulation 41
Track and field 303
Training 21, 81, 203, 428
Training, circuit weight 223
Training, combined running and weight 229
Training, endurance 263, 327, 453
Training, interval 46
Training, physical 344, 453
Training, sprint 453
Training, treadmill 461
Training and LBNP 81
Training effects 249
Treadmill 30, 424, 461, 471, 477
Velocity, approach 57
Velocity, ball 348
Velocity, take-off 57
Ventilation 390
Ventilation, pulmonary 223, 397
Ventilatory control 297
Ventilatory equivalent for CO_2 and O_2 292
Ventricular hypertrophy 72
Ventricular size 344
Vertical impulse 57
Vibration 382
Volleyball 57
$\dot{V}O_{2max}$ 21, 36, 183, 212, 249, 253, 339
Weight 244
Weight lifting and weight lifters 72, 353, 428
Weight loss, body 413
Wind, effects of 41
Work, prolonged 435
Work capacity 65
Work capacity, maximal 218
Work capacity, physical 36, 477
Work efficiency 339
Work-heat tolerance 46
Wrestling and wrestlers 244, 413
Xanthurenic acid 16
